

- Trees to be felled
- Trees to be retained
- Ⓜ Groups of trees/ shrubs to be felled

The next phase of delivering the approved park restoration masterplan will begin in January 2018, with the removal of trees and shrubs to the hall frontage. The Redwood and Mulberry will be retained, along with the small box hedges by the front door. The remaining trees and shrubs will be removed and the ground prepared in February for the laying of a new pictorial turf meadow in March. This perennial meadow will contain a mix of native and non native flowering species to provide colour and nectar from early Spring through to the first frosts. Grass paths through the meadow will allow people to enjoy the flowers and wildlife they attract. [parks@cambridge.gov.uk](mailto:parks@cambridge.gov.uk)
